## Bever Family Dentistry

### Membership Plan

Patients will pay out of pocket for their provided services until a membership plan is purchased. For new patients, a diagnosis will be made at their first hygiene visit and they will be placed on a pediatric, prophylactic, or maintenance membership tier. Once a diagnostic tier is established, the patient will pay the total cost for the membership plan up front. A list of “membership plan services” will be provided to each enrollee based on their diagnosis. Each membership plan purchase is good for one calendar year from the date the membership is purchased. **Patients under membership will receive a 10% courtesy off of any additional services** needed which are not included in their membership package.

Our membership plan includes all of your x-rays, cleaning appointments, and preventative fluoride treatments for the year, plus one additional emergency exam (if necessary). Membership plan pricing is non-negotiable. If you choose to decline any of the membership plan services, the price of the plan does not change. Standard office policies, fees, and financial agreements apply to all membership plan enrollees.

The cost of the membership plan includes all listed membership plan services (see list below). A 10% membership plan courtesy will be applied to any additional services needed at our office.

Over  
\$450 in  
Savings
